Experience

FREELANCE WEB DEVELOPER | JUL 2018 - PRESENT

As a freelancer, I built multiple web applications in various languages and frameworks, namely Django and PHP. All those projects helped me understand the development process from start to end of any application. That experience made me capable of working alone and taught me how to debug and test. Apart from complete web applications from the scratch, I have built some landing pages using HTML5, CSS3, jQuery, Bootstrap and some python scripts in automation, machine learning and data processing.
